

Delivery

kittens around the world

We have been organizing delivery to any country in the world since 2017.

Now kittens from our cattery live on all continents.

About delivery

Distance is not an obstacle to meeting a new family member - the kitten of your dreams. We can arrange delivery to any country in the world.

All documents

We prepare a full package of documents (health certificate (if needed), international veterinary passport and other documents). All you need to do is meet a kitten.

Veterinary care

We provide the best veterinary care for our animals and regularly check their health with a licensed veterinarian.

Comfortable delivery

We select contacts of competent delivery agents who will select the shortest possible delivery path for a kitten. They will try to find direct flights to avoid connections that could lead to an increase in delivery time.

If you decide to purchase two or more kittens in our cattery, the kittens will be delivered together. If we arrange delivery for two kittens, in this case delivery will be cheaper than shipping each separately.

The easy way

Delivery calculation

Based on your location, the delivery agent will calculate the actual cost of delivery and agree on its cost with you and route

You pay

Reserve in the amount of 30% of the kitten's cost (the full cost is paid before the kitten is sent) And the shipping cost to the agent. Sometimes the agent will only charge a fraction of the amount.

Date matching

The delivery agent agrees with you on the exact and convenient delivery date for you, after which he will book a trip for the kitten

Meeting a kitten

You meet your kitten

Delivery details

Our nursery is located in the south of Russia, in the city of Volgodonsk (1200 km from Moscow). Delivery is a stressful time for a kitten, but it's just a few hours in your baby's life, and we do our best to make those few hours pass comfortably and safely.

Some people find that transportation is stressful for the kitten. In our experience, this is not entirely true. It doesn't matter for a kitten how he gets from our house to yours. In our opinion, the experience of a kitten is caused by a change in the environment and the absence of its brothers and sisters. Here it is no longer so important how much time it took for the kitten to move to a new home. Kittens do an excellent job with this process and after a few days they begin to feel like full members of your family.

It is possible to organize the following types of delivery:

Airline delivery ("Cargo") without an accompanying person

If you live in another country, then almost always the delivery of a kitten is carried out by airlines without an accompanying person. This service is called "Cargo".

Due to the high level of provision of air services, the transportation of cats by plane has become commonplace. How is the delivery by "Cargo" plane? The kitten flies on the plane in a special compartment for live cargo. In this compartment, a comfortable air temperature, pressure is mandatory and corresponds to the temperature and pressure in the main cabin of the aircraft in which people fly. Many people think that the kitten will be transported in the shared luggage compartment, but this is not the case. Depending on the type of aircraft, this compartment is located either under the cockpit, or practically combined with the common passenger compartment. In this regard, the temperature regime and air pressure completely coincides with the general cabin and can vary between 18-26 degrees Celsius. In addition, many aircraft are equipped with air conditioning in the live cargo compartment. The airline bears full responsibility for the quality of delivery, therefore the transportation of cats on the plane is paid for at a separate rate. In this regard, the transportation of the kitten on the plane goes smoothly. Animals quickly adapt to flight, and a convenient container limits the pet from additional stress. A kitten on an airplane, in fact, like a person on an airplane, is a full-fledged passenger who has the right to a comfortable trip.

Delivery with an accompanying person

In some countries, delivery is possible only with an accompanying person. This type of delivery is more expensive than "Cargo" delivery. In this case, in addition to the accompanying ticket, it will be necessary to pay for an additional baggage ticket for the animal.

In this case, the accompanying agent, who is also the transportation agent, fully prepares the necessary documents for the kitten for the flight and informs you about all the stages of registration for the flight of the animal on the plane.

If you decide to independently choose a delivery organization or a carrier's courier, we will not refuse to cooperate on delivery with your proposed company or courier.

How much does kitten delivery cost?

Delivery of the kitten is paid by the buyer. We do not include shipping costs in the price of a kitten as shipping costs vary by distance and shipping method. You can find out the actual cost of delivery to your country upon request from the carrier's agent.

What is included in the delivery cost of a kitten?

Standard Shipping:

Meeting a kitten in Moscow

Overexposure with maintenance (if necessary);

Payment and registration of veterinary permits

Payment and registration of customs documents for departure

Transportation payment

Non-standard items can become part of the total shipping cost:

Each country has its own rules for the import of cats. You may need to pay for additional permits (for example, testing a kitten for rabies antibody titers), pay for an import permit in your country, pay customs duties in your country, pay for quarantine in countries where quarantine is mandatory. You can find out the import rules for your country upon request on the special website of your country or from an agent.

To receive a detailed delivery offer from us, please provide the agent with the following information:

delivery city (country);

desired delivery times

Getting your kitten at the airport:

After the agent has booked a flight for your kitten, he will send you all the flight information and a confirmation number, which you must have with you along with your ID in order to receive the kitten.
